

North Sea Region Programme – the OMS

Status on development so far

- + 85% completed
- + Access by all relevant users, both programme side and project side
- + Waiting for:
 - + Audit and recovery module
 - + TA module
 - + System Generated Reports

Features of the OMS

- + API integration with website www.northsearegion.eu
- + Shared Access/ project management tool for projects
- + Decisions for Changes outside of SC meetings

API Integration

- + Allows OMS to provide data to other systems, aka our website
- + Used for: project ideas data, approved project data, user data and statistics
- + powers some mini-sites: project ideas mini-site, projects database mini-site, project webspaces

API Integration

- + Because it saves time
- + Because it guarantees same data in both spaces
- + Managed from the OMS – not from the website

Shared Access

- + the OMS has many types of users, each inviting other types of users....
- + PMU/ BMU
- + Authorised Signatories
- + First Level Controllers

Shared Access – A management tool

- + Provides overview of status
- + Allows for re-invitation or cancellation
- + Completely managed by BMUs and PMU at project level

SC voting on changes

- + Assessment made available to SC in the OMS
- + 15 working days for decision to be entered
- + Rule of "silent approval" managed by the system
- + Decision in the end entered by JS

SC voting on changes

- + Minimises paperwork as both change request and assessment are in the OMS
- + "cheap" solution as no SC meeting required
- + "time saving" solution as no need to wait for next SC meeting
