

keep.eu 2018 training sessions

11/04/2018, 12/04/2018

Munich, Germany

25/04/2018, 26/04/2018

Amsterdam, Netherlands

23/05/2018, 24/05/2018

Lisbon, Portugal

Outcomes

Participants Participating programmes in Annex 1

Direct editing, by programmes' representatives, of the programmes' project-partner-call data

The programmes that have project-partner-call data in keep.eu will be given access to the keep.eu database (through the Kamut tool, which programme representatives can access through keep.eu).

This access will be given to the programme professionals nominated by their respective heads of Joint Secretariat (JS). Interact will send an e-mail to each of these programmes' head of JS asking for the nomination of the colleagues that will have access to change data regarding their programme's project-partner-call data in keep.eu (e-mail and keep.eu user name, since the colleagues need to have registered to keep.eu beforehand).

Further to receiving the nomination from the JS, the nominated colleagues' credentials will be upgraded to editor of keep.eu in the system. These colleagues will then be able to make the needed changes to 'their' data in keep.eu, as shown during the keep.eu training sessions.

Ideas for the use of standard data in the sector

The six training sessions were also meant to provide all participants with a level playing field regarding the potential of keep.eu in their daily professional lives, proceeding from there to showing each participant how programmes will, in the very near future, be able to directly edit their project-partner-call data in keep.eu.

The presentation of the last of the six sessions is in **Annex 2** to this document. Given the above-mentioned goals, this presentation is in itself a description of the sessions' outcomes. However, there was more to these sessions than just training. There were discussions about

the role of keep.eu in the sector and about improvements to make to this tool. Below is the result of these discussions.

Programmes should keep updated and accurate data in keep.eu in order to help the whole sector, in general:

- Build up a memory of itself.
- Improve programme / project monitoring.
- Fight fragmentation, provide coherent, meaningful multi-layer views of itself.
- Improve coordination.
- Improve cross-fertilisation / capitalisation / programming.
- Build up a centralised tool for programming.
- Provide centralised statistical data.
- Improve its visibility.
- Be more easily integrated into other databases.
- Better promote itself (overall, at programme level, at project level).
- Use sectoral data in programmes' and other websites directly from keep.eu.

Regarding content and project management, programmes should keep updated and accurate data in keep.eu in order to help the whole sector with activities as diverse as:

- Aggregate project, partner data at regional, national, European, thematic level (from different programmes), all in one place.
- Get accurate views on any programme's area: Projects and partners from all or selected programmes in a given area.
- Get accurate views on any programme's area and adjoining areas: Assess possible overlaps and synergies between programmes; compare programmes; compare countries / regions.
- Look for possible double funding.
- Compare investment and achievements among geographic and thematic areas.
- Cluster partners thematically all over Europe or in a small region, or per country.
- Capitalise: Share ideas, compare achievements among programmes.
- Help current project and lead partners find new partners.
- Become more transparent and show what it is doing, its results and its impact (overall, at programme level, at project level).
- Direct beneficiaries (partners) to good practices, give them ideas of projects in their own area.
- Attract even better projects / partners.

From national or regional standpoints, programmes should keep updated and accurate data in keep.eu in order to help the whole sector, in general:

- Get accurate high-level views at national and regional level (e.g. with maps and charts).
- Prepare reports concerning specific data – either detailed or broad-scope outlooks, or both – on the sector.

- Provide detailed or broad-scope overviews of the whole sector in the whole of Europe, or in any given country, or in any region of Europe.
- Store and retrieve project- and sector results, better understand projects', programmes' and regions' results.

Further developing keep.eu

The following are the tips that the keep.eu team took home from the participants:

- 1. Excel exports (e.g. export project results to Excel):**
 - a. Text should be wrapped and immediately visible, even if this means further extending the sheets.
 - b. Add to keep.eu the description of each and every project / partner / call fields.
 - c. Replace heading 'Budget' with 'Project's budget'.
 - d. Add the possibility to export to CSV.
 - e. In case of charts, make them more user-friendly.
- 2. 'Partners' section**
 - a. Allow for search in two different periods.
 - b. On top of the results page show summary of criteria and number of resulting records.
 - c. In the result list, replace 'Not found in keep.eu' with 'Unknown (registered partner, not from database)'.
 - d. Add to the partners result page two additional columns: 'Projects in which it took part' and 'Programmes financing the projects in which it took part'.
- 3. 'Countries and regions' section**
 - a. Add an option to generate only partners from the database.
- 4. 'Statistics' section**
 - a. Add budget by programme.
- 5. New project outcome library now being built**
 - a. Explain in keep.eu the classification of documents.
- 6. Editing project-partner-call data in Kamut**
 - a. Possibility to lock all fields for any project-partner-call data
 - b. Make it possible for the programme user to publish imported data

Annex 2

Presentation given at the sessions (as in last session)

Data management in keep.eu

Training

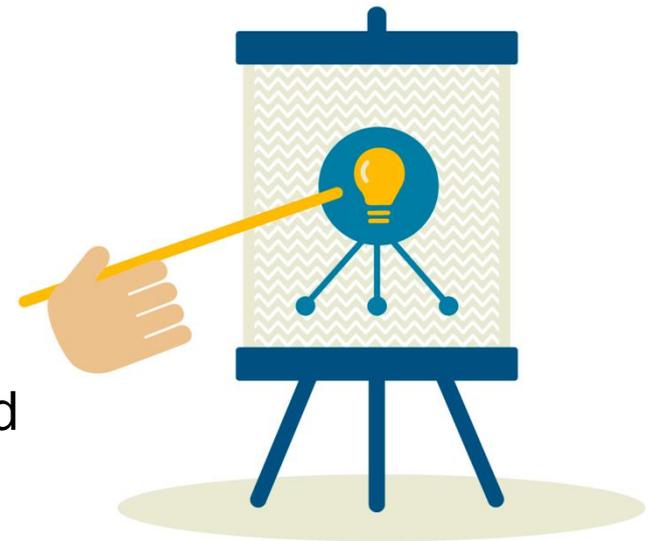

11, 12 April 2018 | Munich, Germany

25, 26 April 2018 | Amsterdam, Netherland

24, 25 May 2018 | Lisbon, Portugal

Rafael Agostinho, Interact

Janne Kiilunen, Interact

keep.eu

Agenda

Let's try to keep times, discuss constructively and have a good time!

09.00 Introduction to the training and to the editing tool

10.30 Coffee break

10.45 Direct editing in keep.eu (published data)

12.30 Lunch

13.30 Direct editing in keep.eu (imported data)

15.00 Coffee break

15.30 The future developments of keep.eu, also GDPR & LOP

16.45 End of meeting, how to stay in touch!

keep.eu

Agenda

And no worries

You will not be working in the actual keep.eu!!!!

keep.eu

By the end of this training, you will have...

- o An understanding of the nature (*positioning*) of keep.eu and how your programme can use it
- o A full grasp of the methods of sending data to keep.eu
- o A thorough comprehension of how data is processed until publication in keep.eu
- o Full knowledge of how to edit project/partner/call data in keep.eu
- o A refined vision of the future of keep.eu and how you can contribute to its shaping

keep.eu

Why am I here?

I want to help better Interreg, through aggregated standardised data

I believe keep.eu can help Interreg only if Interreg contributes

keep.eu

Why am I here?

I want to make it as easy as possible for programmes to have their data in keep.eu

I believe keep.eu can help Interreg only if Interreg contributes

keep.eu

Why should my programme send data to keep.eu?

keep.eu

Why? For whom? What? How?

To help

Interreg, Interreg IPA cross-border and ENI cross-border programmes
in their daily work

by collecting, standardizing, aggregating, classifying, adding value &
publishing project and partner data

keep.eu

Why? For whom? What? How?

Be a tool for when it's needed

Why? For whom? What? How?

- o Thematic search for projects.
- o Clustering by thematic for capitalisation studies.
- o Collect project partners (companies) for tendering processes.
- o Search for projects from other programmes.
- o Check for programme data.
- o Search for data from other programmes or from specific regions.
- o Double-funding checks (reassure MAs and JTSs).
- o Show (heat map) areas where investment in certain fields is lagging behind.
- o Programmes make it mandatory to refer to KEEP before applying for funding.
- o Search for results of Interreg.
- o Promote projects.
- o Collect ideas.
- o Look for partners per geographical area / fields of activity.
- o Reporting.
- o Statistical purposes.
- o ...

KAMUT (Keep.eu Automatic and Manual Updating Tool)

- Web-based tool for importing and publishing data received (automatically or manually) from programmes in keep.eu
- Direct editing of published project, partner and call data
- User access is limited by the programme

Why KAMUT?

1. Interface for Programmes to directly edit their data at any time
2. Automatic features covering Thematic assignment and language detection
3. Simple workflow from receiving data to publish in keep.eu
4. Version control
5. All changes done directly in keep.eu
6. Programme involvement for data management before publication

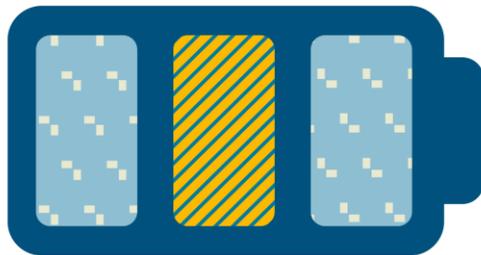

Preconditions for data editing

1. Data published in keep.eu
2. User account in keep.eu
3. Assignment of programme data editing for the user account
(request to be submitted to keep.support@interact-eu.net)

Training programme

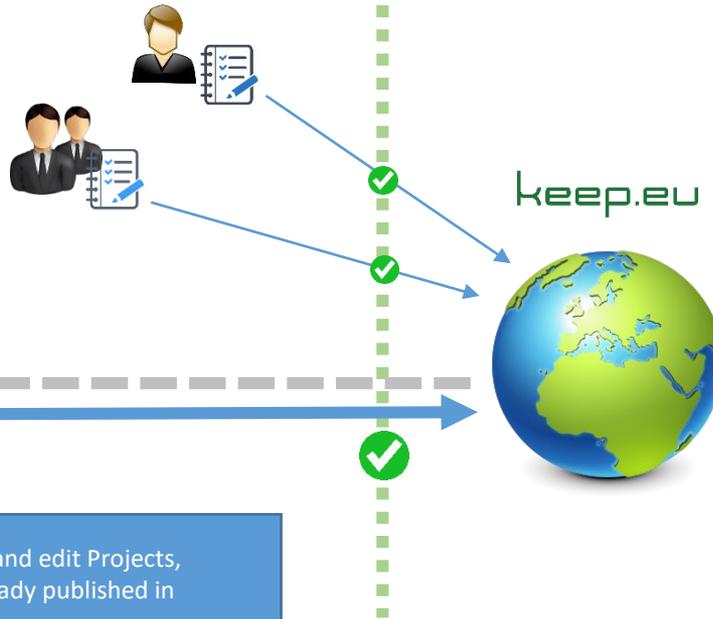

1. Learn how to use direct data editing in KAMUT and publish the data in keep.eu
2. Learn how to work with imported files (automatic data from monitoring system)
3. Workflow of data importing to publication in keep.eu in both automatic data transfer and manual excel import

Editing published data

Editing published data

Direct access to any programme for data editing and management of Thematics

- A Programme User access and edit Projects, Partners and calls data already published in keep.eu;
- Applied changes can be published to keep.eu without any further approval step.

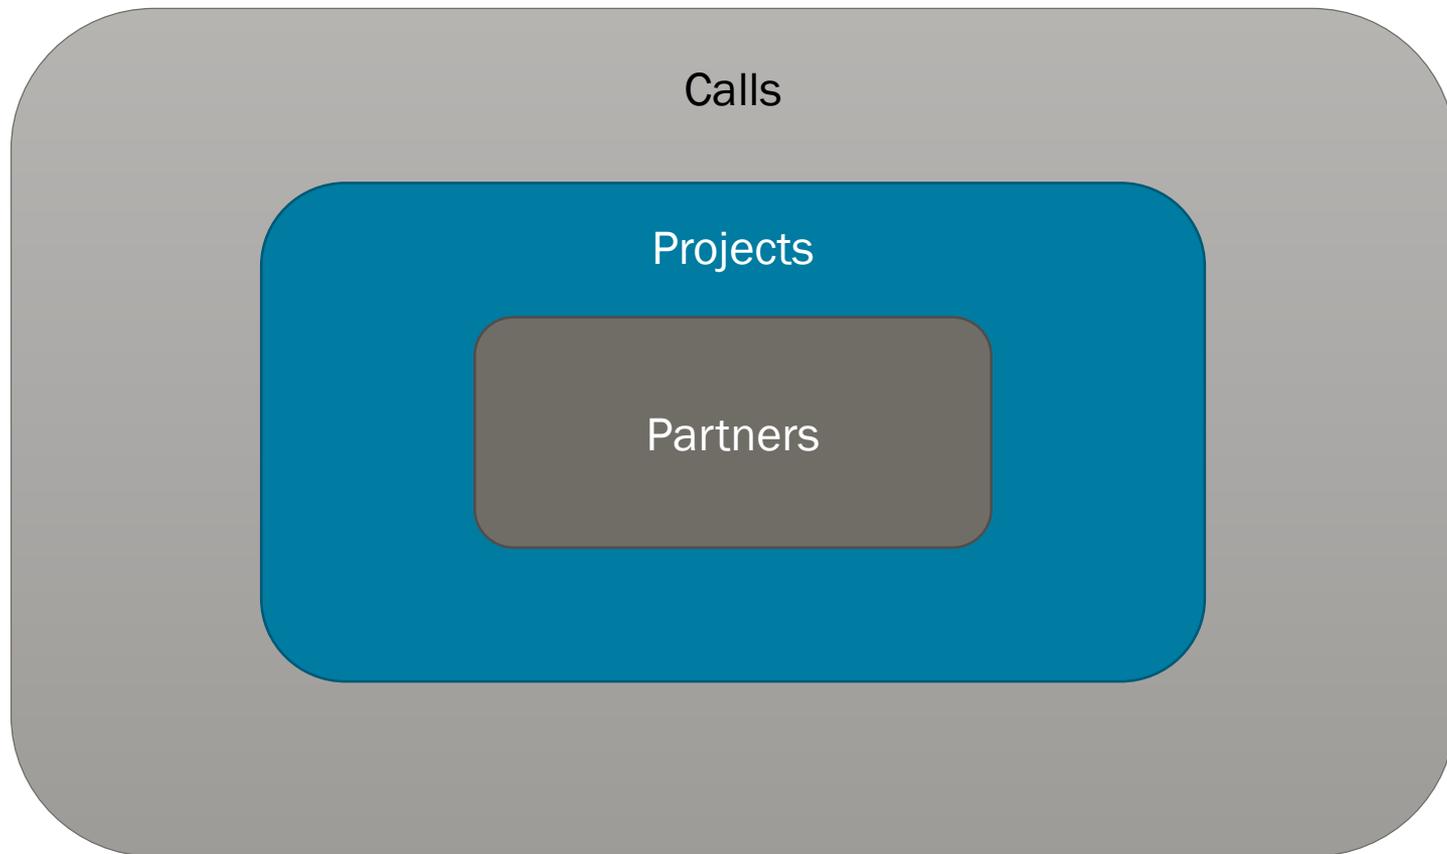

PROGRAMME USER
Edit and publish data directly in keep.eu

KAMUT Administrator
Edit any programme data and check/edit keywords assigned to projects.

Connection between calls, projects and partners

Partner geolocation

Update partner location

In case the partner location is not correct, the address needs to be corrected and geolocation updated.

In case Google Maps doesn't recognise the address, the geolocation can be manually changed by dragging the pin on map.

The screenshot shows a form for updating a partner's location. It consists of four rows of input fields, each with a dropdown menu and a confirmation button:

- Street:** Suburgötu
- Postcode:** 101
- Town:** Reykjavik
- Country:** Iceland

Below the form is a Google Map of Iceland with a red pin on Reykjavik. A blue callout box with the text "Update partner location" points to the "Update Location" button.

GDPR + List of operations

Example of list of operations in keep.eu

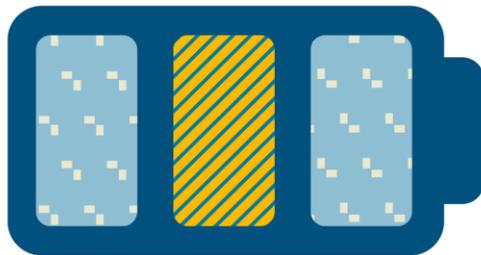

What's next for keep.eu

The core II – Functions, what’s about to come?

- Lists of operations hosted in keep.eu
- IPA-IPA CBC
- Interreg & the big picture: Support ESPON in the rollout of the TerrEvi project (data to be inserted in 2019).
- Statistics: Complete makeover and new functions for a much-improved user experience (eg charts on top of maps, charts with more than one metric, new filters...), more clarity.
- Projects: New criteria and make over of the section.
- Projects, Library: Project output document collection and initiation of an output document library.
- Partners: New criteria and make over of the section.
- Embedding keep.eu in Programmes’ websites.
