

Staff costs – the theory

Staff costs in Interreg – Theory and practice

30 August 2018, Frankfurt, Germany

Mattias Assmundson, Interact Programme

Your task – work in groups (per table)

- decide on the staff costs calculation most suitable for the staff involved in the project
- calculate staff costs for the month of May and June for each employee
- Note the different steps so we can discuss it afterwards

STAFF COSTS	Most suitable staff costs method (and why)	Staff costs May	Staff costs June
Annika	full-time	3,800	3,800
Mikael	66%	2,112	2,112
Robert	1720h=17,44 monthly=16,44 (May)	-	-
Agnes	1720h= 20,93 monthly = 19,72, 21,98	2134.86 2011.44	1758.12 1846.32
Jan-Erik	contract= 26.38€ (25+((120*12)/52/20))	158.28	316.56

Please note, those are not right or wrong numbers. This is an example of how the result of the calculation could look like.

Cooperation works
