

Gold Plating

IPA - CBC programmes finance meeting
20 - 21 November 2019 | Vienna,
Austria

Malgorzata Zdunek, Interact

Group work!

Timing:

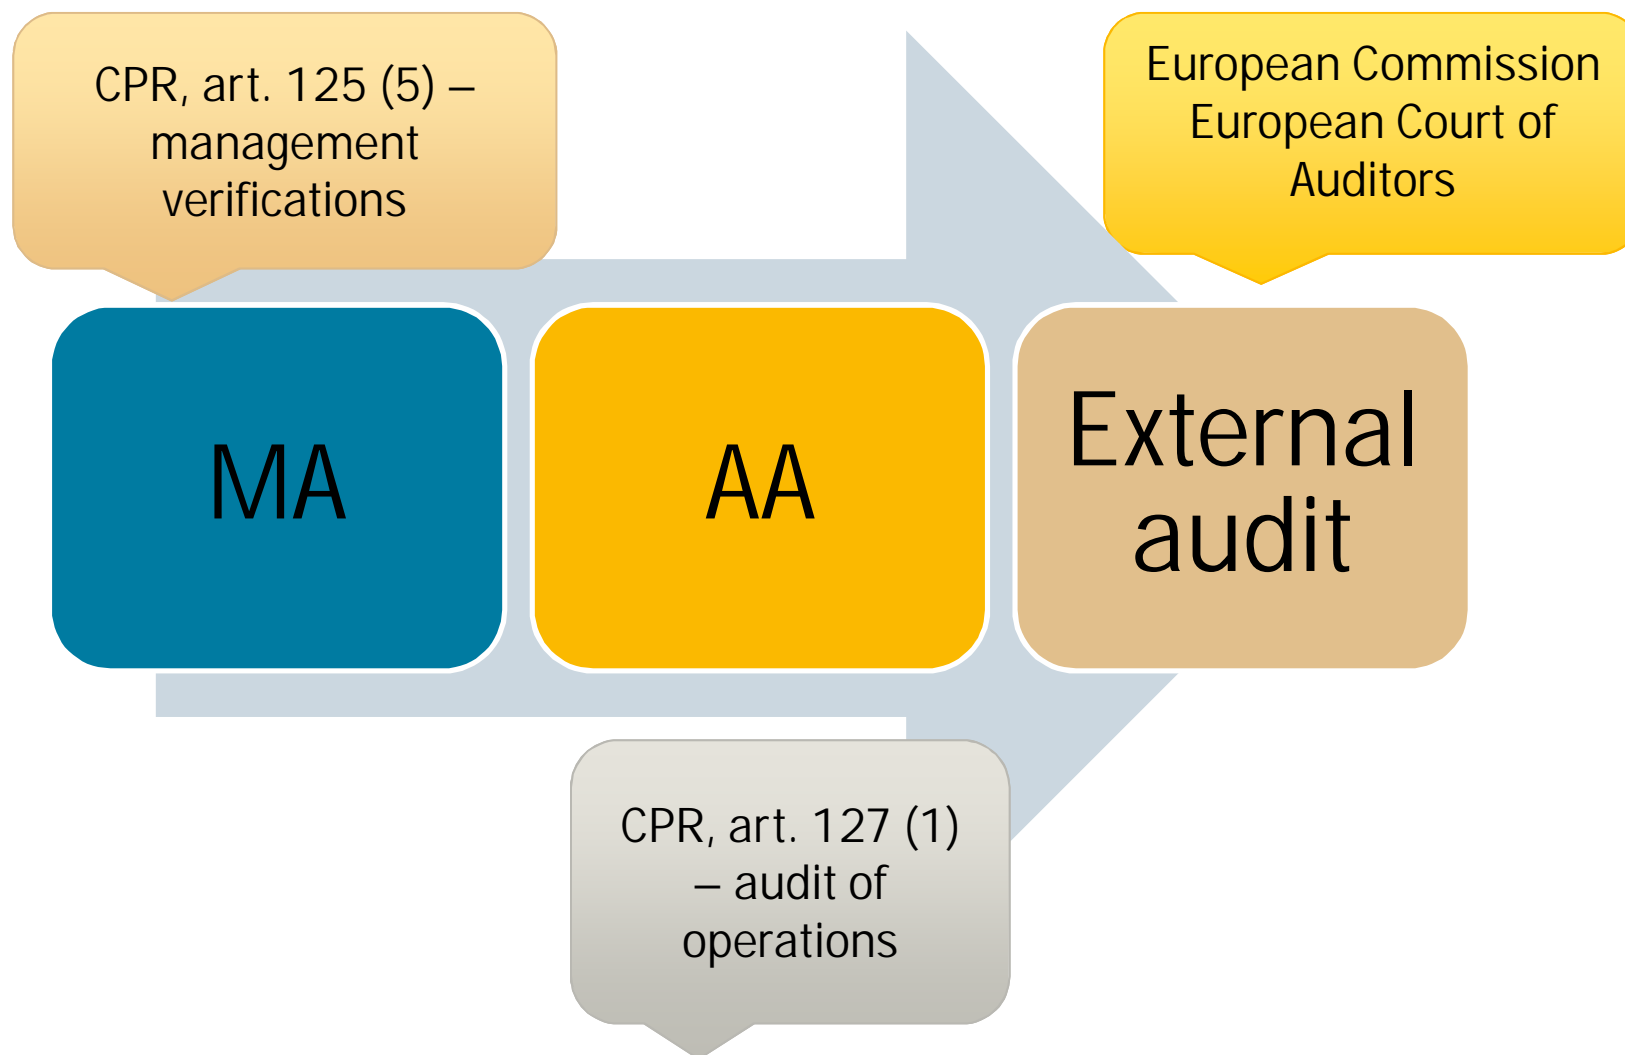

40 minutes

Task:

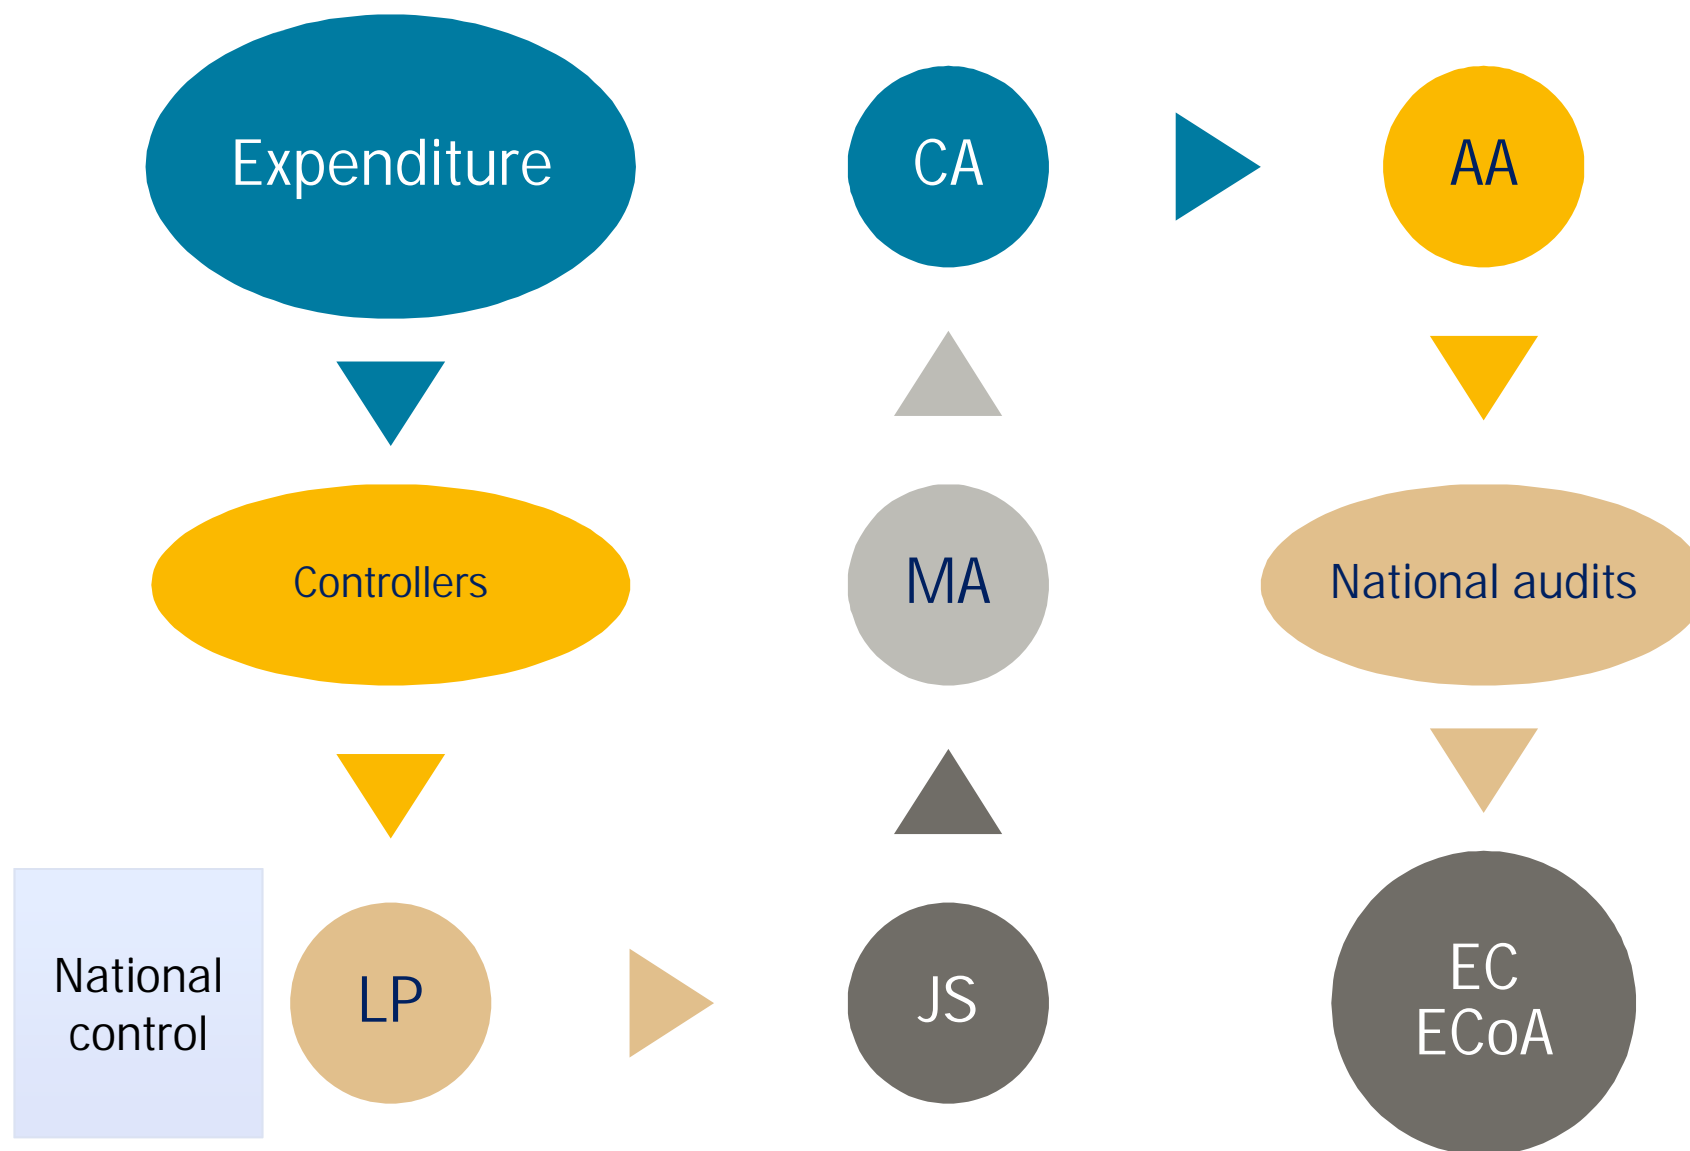

- Share with others how the control system is built in your programme
- Pick the most elaborated and complicated one
- Draw the scheme at the flip
- Briefly present to other groups

Regulatory framework

Management verifications and audits

What is gold plating?

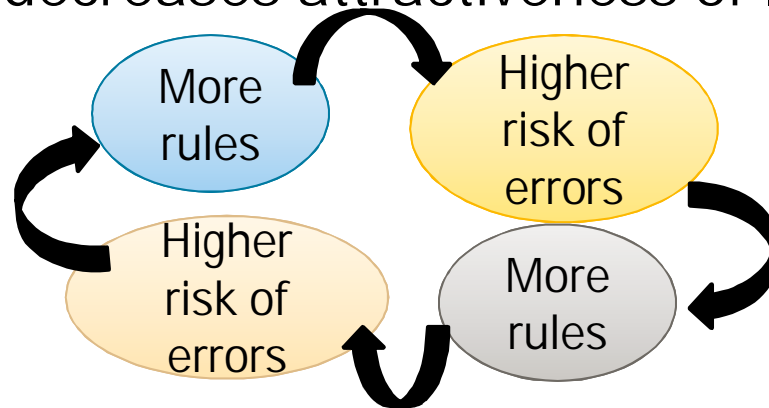

Imposing additional administrative obligations on top of the minimum requirements set by the ESIF regulatory framework; i.e. additional work burden **without or with marginal added value**

Golg plating in Interreg

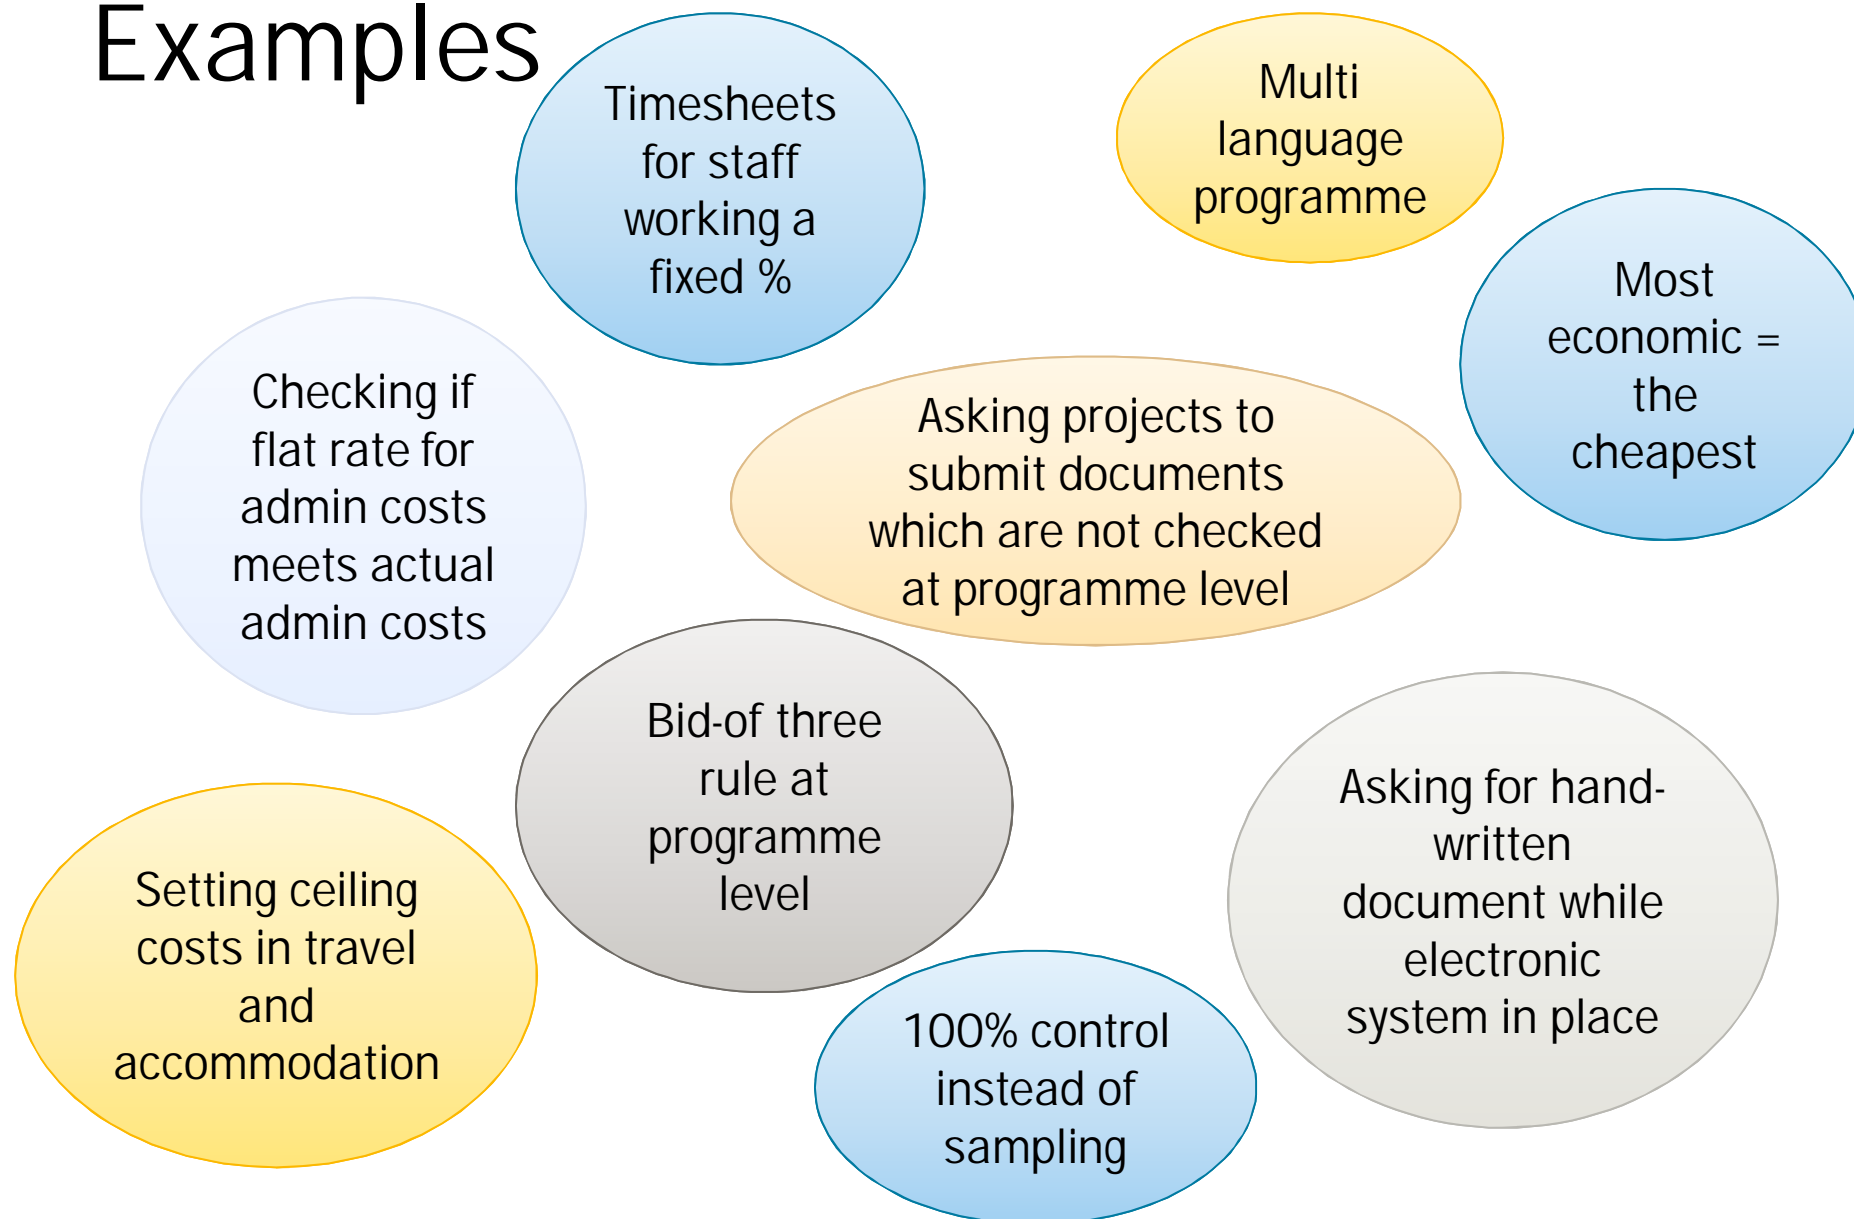

- Affecting more strongly as high numbers of administrative players
- Increases cost for programme administration and beneficiaries – decreases attractiveness of Interreg

- Vicious circle:

- Decreases projects quality -> compliance over performance
- Unfair towards smaller organisations as beneficiaries

Examples

Cooperation works
