MS Post2020 Milestone review

30 September 2020
FINAL Agenda
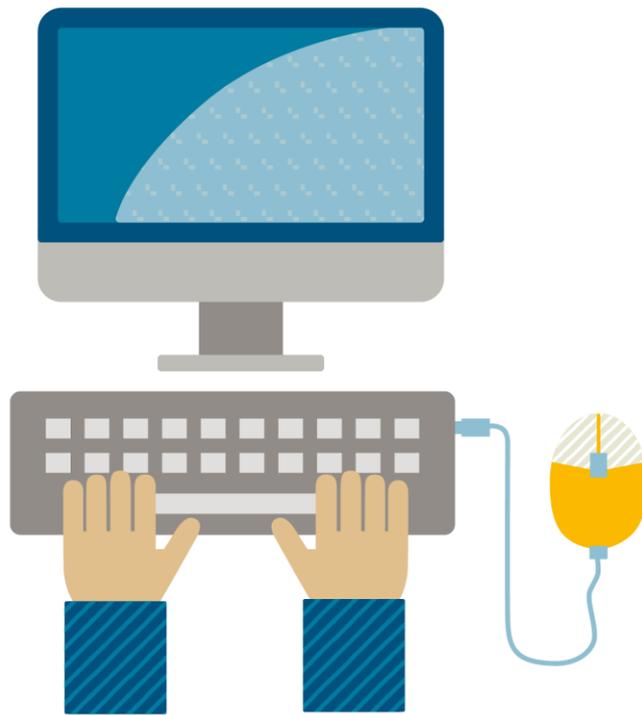

Outline

Now is the right moment to address and inform all potential future users on the state of play!

The first Milestone review meeting will bring together those who are interested in the development of the new monitoring system post2020 and are keen to see the first implemented features.

In December 2019, Interact Monitoring Committee gave the green light for the preparations of the future Interreg monitoring system. The goal is that the new system allows receiving and proceeding applications starting mid of 2021.

As an overarching goal, the new system should be more user-friendly than the current eMS. When looking at the different user groups, we are facing a wide range of expectations. To safeguard high usability next to meeting EU requirements and the work with the Core Group, also the regular exchanges with the User Group should become 'checkpoints' in the development process for the next 1.5 years.

Besides fortnightly Sprint Reviews, we aim to organise Milestone Reviews where more significant developments can be demonstrated to collect the feedback from a broader group of users.

Objectives

The meeting aims to:

- Inform on the state of play of the development of the monitoring system post2020.
- Demonstrate the first implemented features.
- Gather input from the broader expert group.

What can you expect from the first demonstration?

- The system provides a simple user role management for applicant, programme user and administrator.
- The basic application workflow including status management from creation of an application until decision is provided.
- Programme setup: the main data which are necessary for the intervention logic and call specification can be configured in the system.
- First elements of the online application form are available.
- The system can be translated and provided in more than one language.

Final agenda will be sent out one week before the meeting.

MS Post2020 Milestone Review
30 September 2020
Online meeting

Wednesday, 30 September 2020

9.30. - 9.45   Welcome and introduction
