REGULATION (EC) No 1080/2006 of the European Parliament and of the Council

Article 16

Control system

In order to validate the expenditure, each Member State **shall set up a control system** making it possible to verify the delivery of the products and services co-financed, the soundness of the expenditure declared for operations or parts of operations implemented on its territory, and the compliance of such expenditure and of related operations, or parts of those operations, with Community rules and its national rules.

REGULATION (EC) No 1080/2006 of the European Parliament and of the Council

Article 16

Control system

For this purpose each Member State shall designate the controllers responsible for verifying the legality and regularity of the expenditure declared by each beneficiary participating in the operation.

WHAT IS FLC CHECKING?

Costs actually incurred during the implementation period of the Action

Budget is respected

The expenditure for a selected item was necessary for the implementation of the Action

The procurements are awarded according to the applicable legislation (European, national and programme rules)

Expenditure for a selected item is substantiated by evidence and notably the supporting documents

The monetary value of a selected expenditure item agrees with underlying documents (e.g. invoices, salary statements) and that correct exchange rates are used

The expenditure item has been classified under the correct (sub) heading of the Financial Report

Expenditure for a selected item is recorded in the Beneficiary's/Partner's accounting system and was recorded in accordance with the applicable accounting standards of the country

The services, goods and works procured are specified in the application form and are in accordance to the term of reference of the awarded contracts

The expenditure for a selected item does not concern a non-eligible cost

Verifications concerning project partners to identify potential risks of irregularities or fraud

IMPORTANT REMARKS

The Expenditure
Verification Coverage
Ratio is 100%.

On the spot check – at
least once during
implementation
