

# IT Tools and Monitoring Systems Network

**23 and 24 June 2021 (9.30 - 12.30 CET)**  
Online meeting  
FINAL Agenda

## IT Tools and Monitoring Systems Network 23 and 24 June 2021

### Outline

The monitoring systems and IT tools network aims at Europe-wide learning and exchange of experience and information among experts in Interreg monitoring systems and related IT Tools. Monitoring systems play a key role in programme management and also represent the programme to the outside world. There are many topics of joint strategic and practical interest to Interreg monitoring systems experts. Therefore, this network ultimately aims to exchange and provide attractive and straightforward solutions to programme stakeholders, including project applicants.

### Objectives

For the 2021-2027 programme period, programmes are reconsidering the use and way of using monitoring systems. At the same time, programmes are busy with closing the 2014-2020 programme period. Therefore, the objective of this meeting is to focus on useful IT features related to these two topics, being; **the development of the first steps of the project lifecycle**, particularly; call management, project application, project selection, assessment and decision making and on the other hand features related to **the current programme- and project closure**.

Following a flexible and participants-driven approach, the detailed content of this meeting is established based on a survey during registration and programmes proposed presentations of the features.
