Online meeting

Jems 3rd Milestone Review

19 October 2021

Online meeting

Outline

In December 2019, Interact Monitoring Committee gave the green light for preparing the future Interreg monitoring system. We already had more than 30 Sprints of development, and the application module enables programmes to open their first calls in the system! The system is ready to go into production!

Besides fortnightly Sprint Reviews, Milestone Reviews are organised to demonstrate more significant system developments and collect feedback from a broader group of users.

Similarly to the two previous Milestone review meetings, we aim to address and inform all users and potential future users of Jems on the state of play of developments!

When looking at the different user groups, we are facing a wide range of expectations. To safeguard high usability next to meeting EU requirements and the work with the Core Group, regular exchanges with the User Group have become 'checkpoints' in the development process.

Objectives

The meeting aims to:

- Inform on the state of play of the development of Jems.
- Demonstrate implemented features and information on the following features to be implemented.
- Gather input from the broader expert group.

What can you expect from the demonstration?

- System privileges management
- Improved translation management
- Application:
 - AF fields configuration
 - State Aid
 - 2-step procedure
 - Version history
 - Pre-submission checks
 - Improved file management

The final agenda will be sent out one week before the meeting.

Jems 3rd Milestone Review

19 October 2021

Online meeting

Tuesday **19 October 2021**

9.30 - 9.45 **Welcome and introduction**
