Jems
IT workshop

6th July 2022
Draft Agenda

Online meeting

Outline

Many programmes that signed the licence agreement for the usage of Jems, are now in the process of installation and possible system customisation. Despite the documentation provided, there is always space for many questions on the IT technical level. This event aims to address all possible technical questions.

Interact invites anyone (including external IT providers) **responsible for installing or customising Jems** to join the workshop. Due to the IT technical nature, IT skills are required to participate, such as Linux OS administration (for installation) and Java/Kotlin coding (for customisation of the addon).

This event will be recorded and published as part of the Jems documentation.

Objectives

The meeting aims to transfer knowledge on:

- Installation of Jems
- Build Jems from source-code
- Customise pre-check addon
- Customise data-export addon

The final agenda will be sent out one week before the workshop. Due to the nature of the event, we can not guarantee that we will strictly follow the timing of the agenda topics. We will stay flexible to adjust to participants' interests.

Wednesday   6th July 2022

9.30 – 9.45   *Welcome and introduction*

9.45 – 11.00   Jems Installation (via Docker)
