

IT Tools and Monitoring Systems Network

5-6 October 2022
Thessaloniki, Greece
FINAL Agenda

IT Tools and Monitoring Systems Network

5-6 October 2022

Outline

The monitoring systems and IT tools network aims at Europe-wide learning and exchange of experience and information among experts in Interreg monitoring systems and related IT Tools. Monitoring systems play a key role in programme management and also represent the programme to the outside world. There are many topics of joint strategic and practical interest to Interreg monitoring systems experts. Therefore, this network ultimately aims to exchange and provide attractive and straightforward solutions to programme stakeholders, including project applicants.

Objectives

For the 2021-2027 period, programmes have started building new or adapting their monitoring systems to the new regulations. Furthermore, programmes are looking into further simplification or improvements of the processes in monitoring systems.

The objective of this meeting is to have programmes share experience and expertise on useful IT features, tools and other simplifications or improvements.

Following a flexible and participants-driven approach, the detailed content of this meeting is established based on a survey during registration and programmes proposed presentations of the features. There will be time reserved for more open discussions on monitoring systems.

IT Tools and Monitoring Systems Network 5-6 October 2022

Wednesday 5 October 2022

14:00 – 14:30 *Registration and Welcome Coffee / Tea*
