Data and web fundamentals for non-geeks
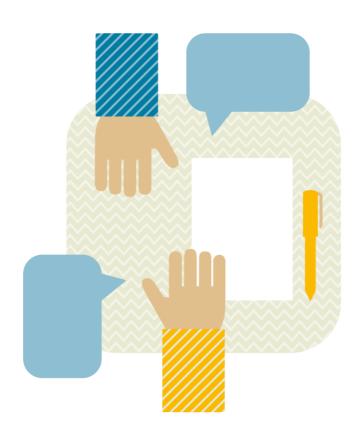

25 October 2022
Webinar: Data and web fundamentals for non-geeks
Online, in MS Teams

Outlines

Of all the tech buzzwords, which ones matter for us to have a bit of a better understanding of the world that surrounds us? If we are working in Interreg programmes, we hear much and we miss many. Knowing some might come in really handy and might even help us in our daily lives and work tasks.

Objectives

This webinar will be around one-a-half hours, but we want to make time for participants' questions, hence let's earmark two full hours. The goal is to explain a few fundamental concepts that we believe will help participants make more sense of the digital world that is fast becoming the nervous system of every organisation. Check the following page to see the concepts that we count on touching (subject to change).

To attend this webinar there is no need for any prior knowledge of IT or any related subject.

Single day   **Tuesday, 25 October 2022**
                    (all hours are in Central European Time)

09.20 – 9.30   Check-in to the virtual meeting room and technical settings

9.30 – 11.30   **Concepts that we will introduce:**
- Big data
- Open data
- Cloud computing
- Databases, data lakes, data warehouses
- Data pipelines
- Data structures, SQL, JSON, XML, YAML
- APIs
- SLAs
