IT Tools and Monitoring Systems Network

18 April 2023

Online meeting

Outlines

The IT tools and monitoring systems network aims at Europe-wide learning and exchange of experience and information among experts in Interreg monitoring systems and related IT Tools. Monitoring systems play a key role in programme management and represent the programme to the outside world. There are many topics of joint strategic and practical interest to Interreg monitoring systems experts.

Experts directly involved in the work with monitoring systems (specification of requirements, system customisation to programme needs, testing etc.) are invited to participate in this meeting. Service providers of programmes are also welcome to take part in this meeting.

The IT tools and monitoring systems network meets biannually. This time we will meet online, and the second meeting this year will be organised as a physical meeting.

Please note that this event is not a Jems related event. Jems electronic monitoring system will not be discussed or explicitly demonstrated at the event.

Objectives

The objective of this meeting is to focus on useful IT features or simplifications.

This event is organised following a flexible and participants-driven approach. The detailed content of this meeting is established based on a survey during the registration where programmes propose topics they would like to present and/or demonstrate. Time will also be reserved for more open discussions on monitoring systems and common challenges.

IT Tools and Monitoring Systems Network

18 April 2023

Online meeting

Day One

Tuesday, 18 April 2023

09.30 – 09.45

Welcome and Introduction

09.45 – 10.15

State of play

Interact together with programmes

A short update on the programme status regarding monitoring systems.

10.15 – 11.15

Timeslot for the feature demonstrations

Interact together with programmes

Organisation database & current developments (partner reporting/control)

Aleksandra Niechajowicz (Interreg Europe)

New modules for AF and future developments on reporting

Zrinka Šajn, Luis Hancoco (UIA)

11.15 – 11.30

Comfort break

11.30 – 12.00

Use of API

Amund Sole (Central Europe)

12.00 – 13.15

Discussions on the topics brought up by participants via registration

- Sampling and parking
- SFC, how you plan to deal with MS data
- Plans for audit and payment modules
- Reports, statistics, graphics
- Other topics brought up by participants

13.15 – 13.30

Wrap up and discussions on potential topics for the future meetings

Interact programme

End of the meeting
