Fast track lump sum payments
Creation of Advance payments

Contracting

Functional, all HIT sections

Draft budget

Project proposed Unit costs

Partner reporting

Finances and content

Controllers

Create institutions and assign users
Assign institutions to projects

Hotfixes
V6.0.X

Hotfixes are minor updates solving critical bugs (business logic, security,...). They are often found around a major release.

Interact strongly recommends to update Jems as soon as a hotfix is published!
This can mitigate data losses or eventual complex migration/recovery of the system.
Hotfixes documentation can be found in Jems manual – it is important to read the release notes!

Hotfixes announcements are always posted on communities - and eventually presented in sprint reviews.
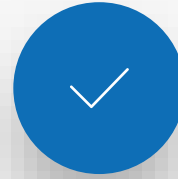

7th Release
30.6.2023

Partner level control

Functional, acc. HIT

Project reporting

Finances (payment claim) and content

GDPR protection

LoE items and procurement files

Notifications and document sharing

Notify upon status change
Project document section

Jems roadmap

Jems
Joint electronic monitoring system

Winter/spring 2023
🎯 Partner control and Project reporting

- Management verification on partner level (finances and content)
- Reporting on project level (finances and content)
- Notifications and document sharing
- GDPR files

Summer 2023
🎯 MA/JS verification and Payments

- Management verification on project level (finances and content)
- Regular payments to projects
- Programme reports to European Commission (SFC transmission of data)
- Additional features according prioritisation

Autumn 2023
🎯 Programme Monitoring

- Audit and corrections
- Programme level monitoring, overviews and statistics
- Programme reports to European Commission (SFC annual accounts and payment claims)
- Additional features according prioritisation

Winter 2023/24
🎯 Closure

- Monitoring of EC payments to programme
- Programme and project closure
- Additional features according prioritisation

Spring till end 2024
🎯 "Nice to have" phase

- Extension of features adding value to the system (according to prioritisation)

Status: 16.3.2023
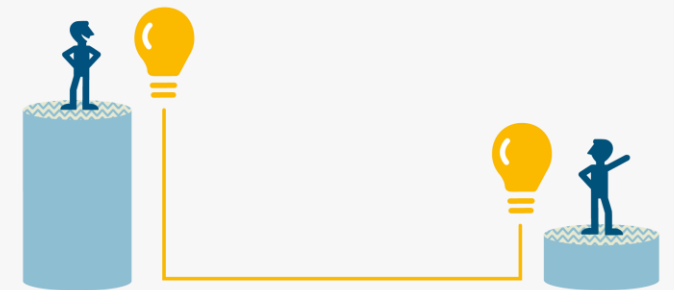

Longer term prioritisation

Core development phase till end of Q1 2024:

Provision of the whole programme and project workflow
Additional „horizontal" features (to be prioritised with care)

Additional developments till end of 2024:

Adding the most valuable features from a (quite large) collection of suggestions

Cooperation works
