Step one...

Announcement in Interact communities

- Explain the problem (and possibly the solution)
- Engage with other programmes (they might have same issue)
- Interact might be interested to have in official release

Further details in [Jems.interact-eu.net/manual](https://jems.interact-eu.net/manual) (section Support/JemsCloud)

Step two...

Share the development

- Request Interact for account in Jems Cloud (write privilege)
- Upload files + documentation
- Update communities announcement (files link)

Further details in jems.interact-eu.net/manual (section Support/JemsCloud)

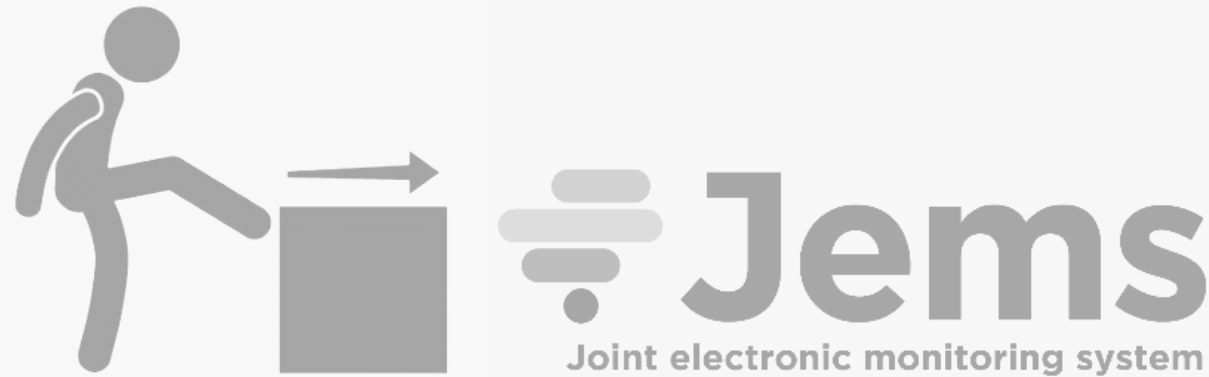

Community developments into Official releases

Main challenges:

- Business requirements
 - Functionalities are not needed by majority of Interreg community
 - *Too many features bring more bugs/maintenance cost
- Technical integration
 - Convert community development code „compatible“ with Jems
- Feasibility
 - Timelines, prioritization...
