

INTERact

Project Development Seminar

Intervention Logic

18 - 19 February 2016 | Stockholm, Sweden

Interact is co-financed by the European Regional Development Fund (ERDF)

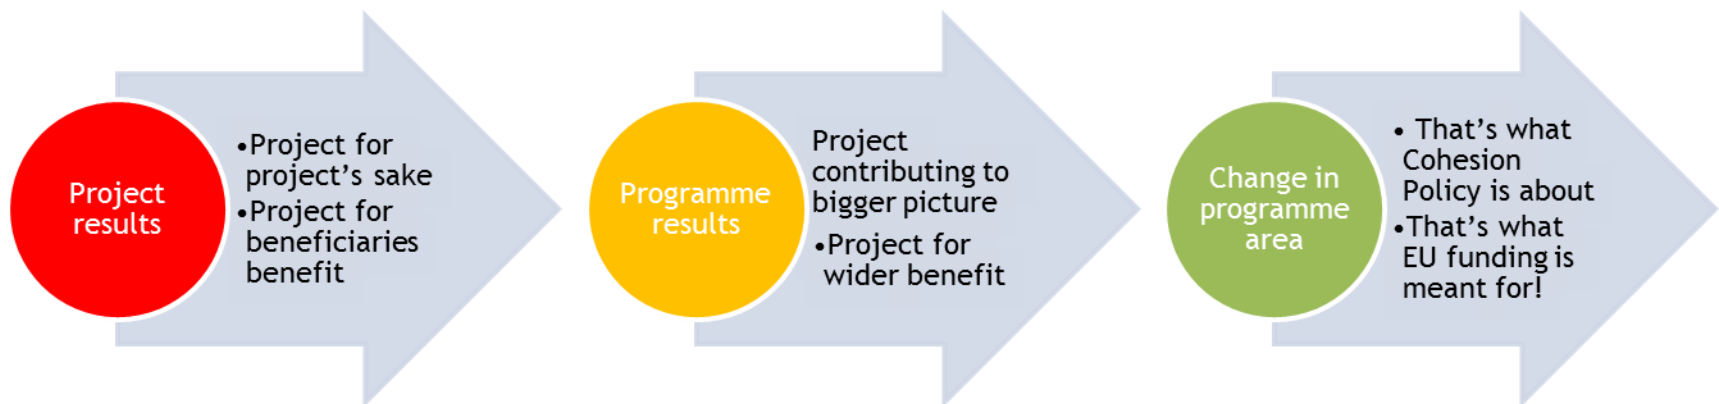

Topics to be covered

- Explanation of Programme and Project Intervention Logics)
- Practical exercise (link between programme and project intervention logics)

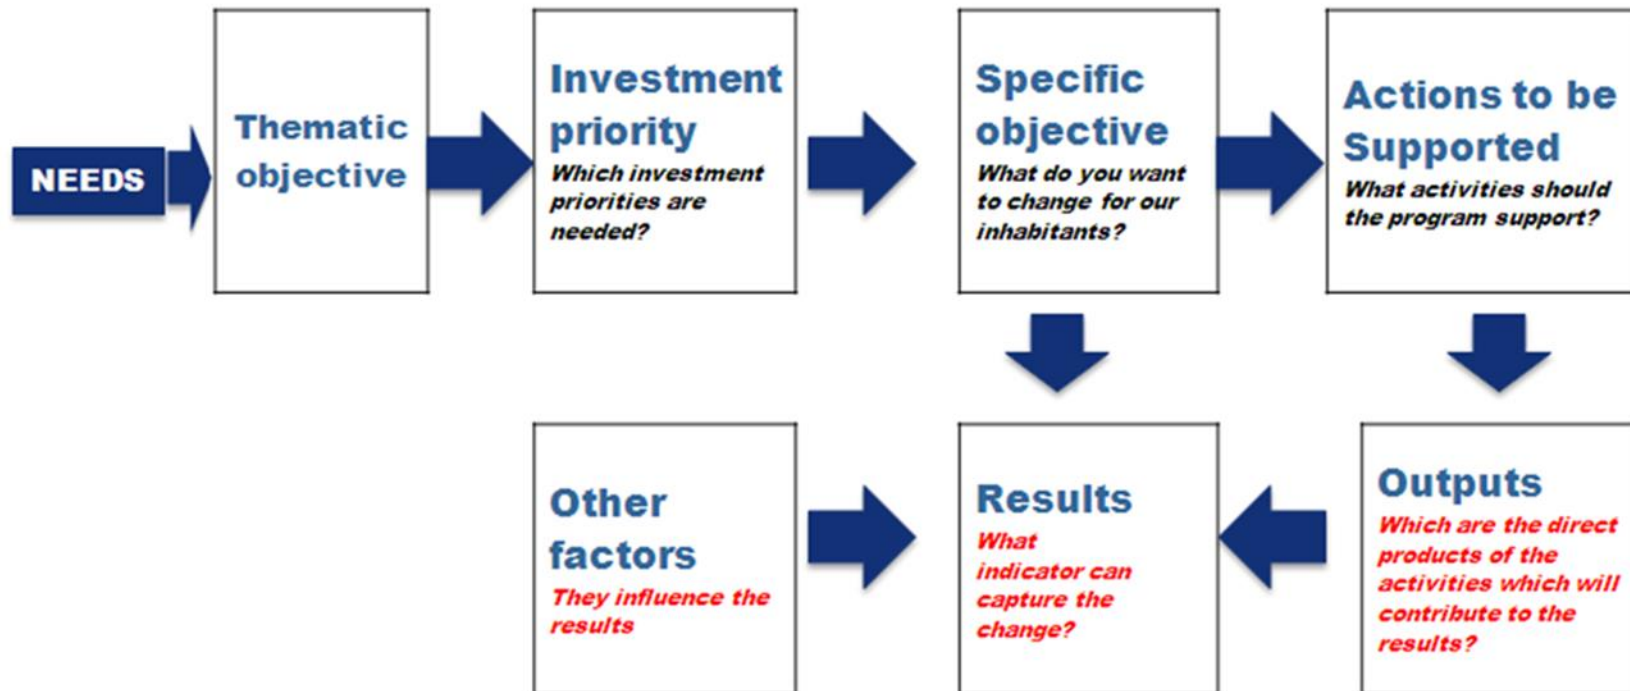

Focus on results & link between programme and project intervention logic

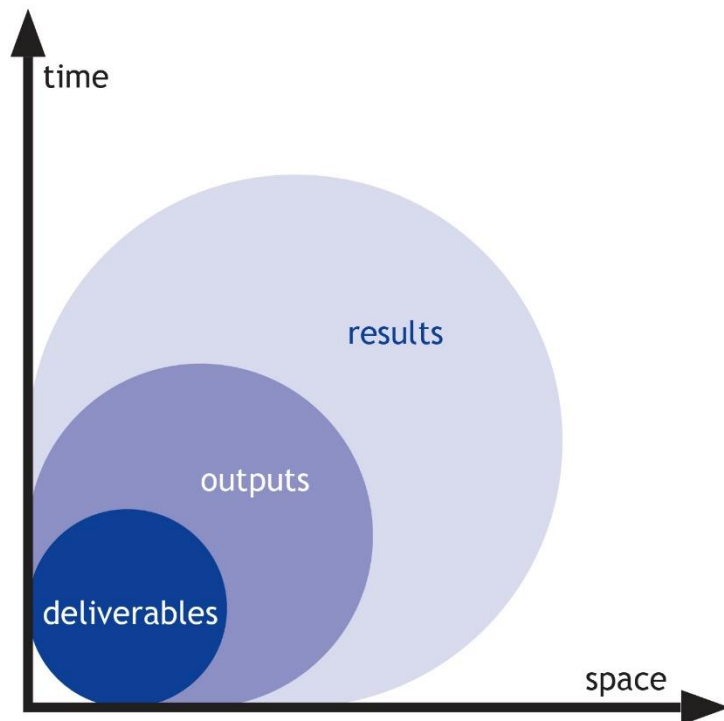

The Programme Intervention Logic

Intervention logic

Project Intervention Logic

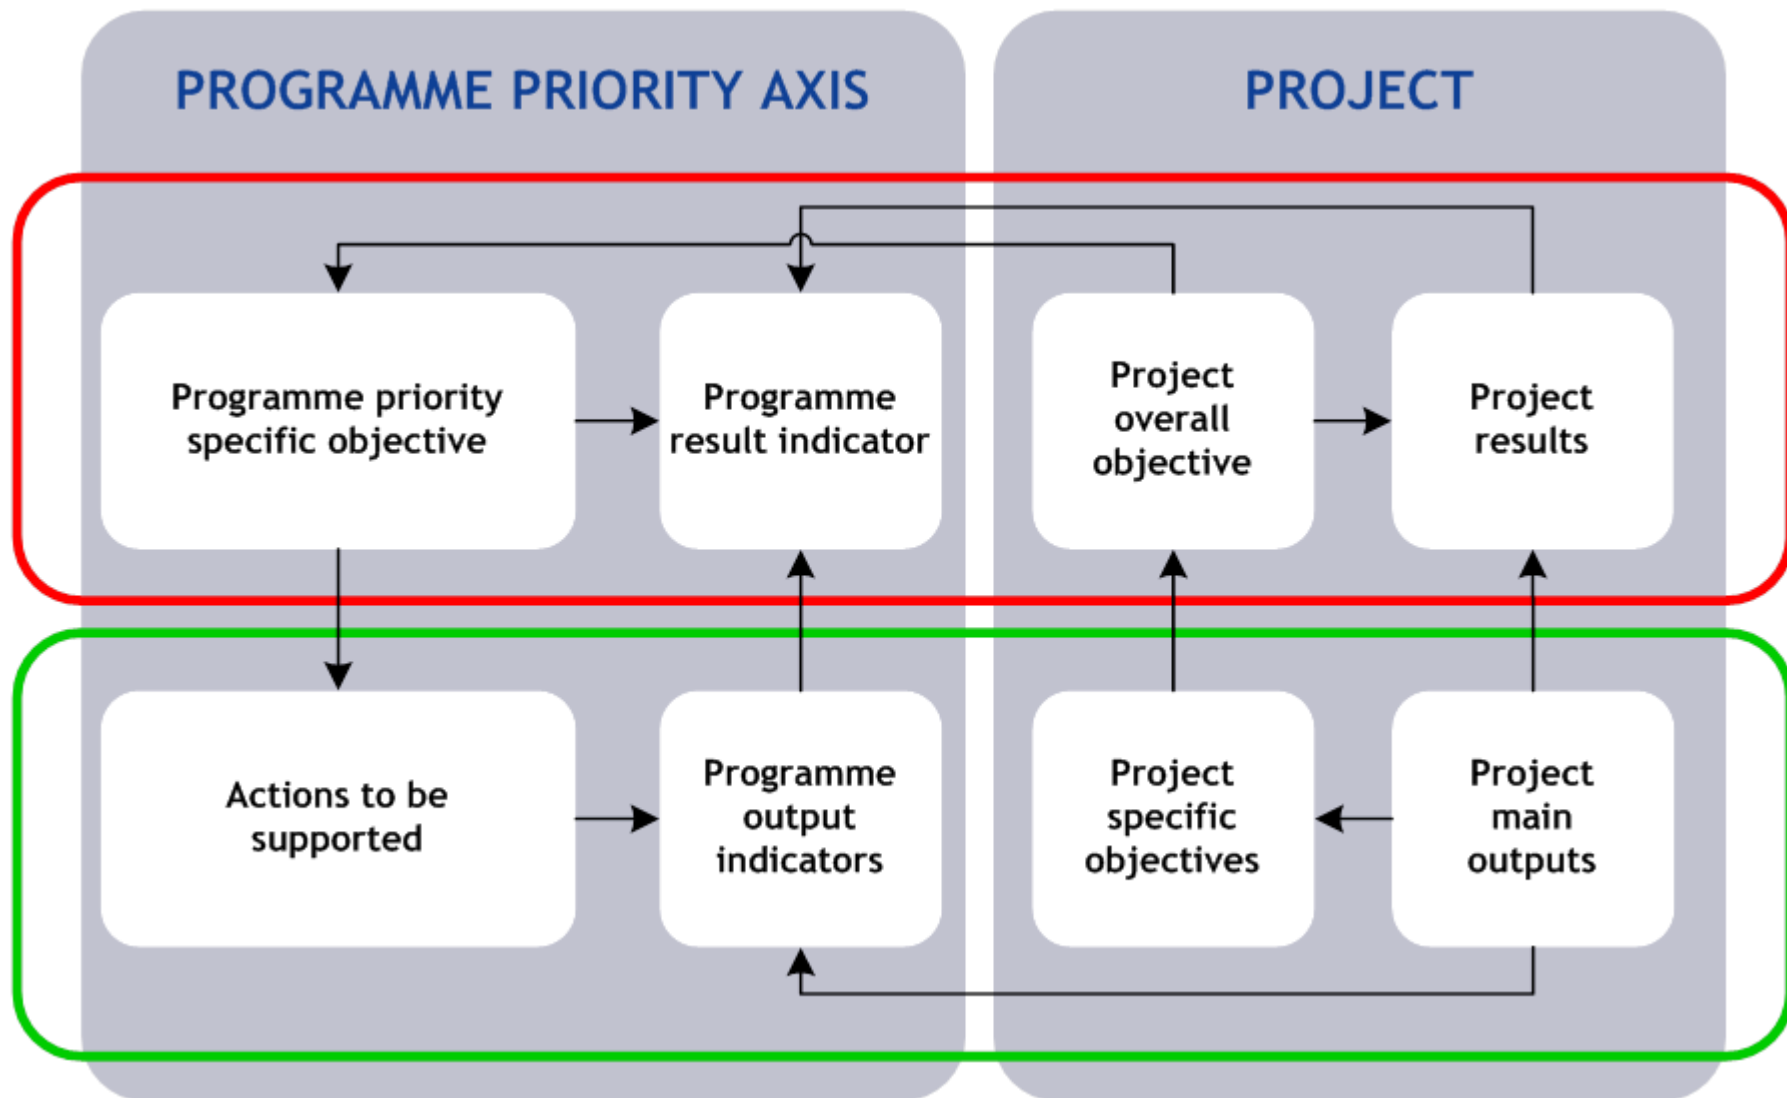

Project Intervention Logic Definitions

Overall objective: Provides overall context for what the project is trying to achieve, and aligns to programme priority specific objective. It relates to the strategic aspects of the project.

Specific objective: A concrete statement describing what the project is trying to achieve referring to project main outputs. It can be evaluated at the conclusion of a project to see whether it was achieved or not.

Project result: The immediate advantage of carrying out the project telling us about the benefit of using the project main outputs. It should indicate the change the project is aiming for.

Project main output: The product of the activities funded telling us what has actually been produced for the money given to the project. It contributes directly to the achievement of the project result.

Why to make a link?

Only if project objectives contribute
to programme objectives... and
Only if project indicators contribute
to achievement of programme indicators
...will the project be financed!

Your ideas?

How to make a link ...

Programme output indicators	Project main outputs
Number of people trained on energy efficiency	250 people from the whole programme area trained on energy efficiency in primary and secondary schools
Number of enterprises cooperating with research institutions	<ul style="list-style-type: none"> • 3 medium-sized enterprises • 12 micro-sized enterprises (3 from each participating country)
Length of newly built, reconstructed or upgraded transport infrastructure	8 km of newly built road connecting village D from YY and town U from XX

How to make a link ...

In the HIT application form:

- Select programme priority
- Select specific objective
- Select on result indicator and describe how the project can contribute the programme result (not aggregated)
- Output indicator: select one per output (will be aggregated)

Linking the project to the programme intervention logic programme perspective

Advantages

-

Disadvantages

Linking the project to the programme intervention logic project perspective

Advantages

-

Disadvantages

Linking the project to the programme intervention logic project perspective

Advantages

- Present concrete outputs (aggregate outputs)
- Clarity how the project can benefit to the programme area
- Structured approach when developing their project idea

Disadvantages

- Less room for innovations
- LP might perceive certain documents more complex
- Formally exceptional projects created by project writers

Linking the project to the programme intervention logic programme perspective

Advantages

- More clarity how the project can benefit to the programme area through contributing to the programme objectives/results
- It should be easier to monitor for programme staff
- It should be easier to evaluate

Disadvantages

- Less room for innovations
- lower number of proposals received because the programme specific objectives are perceived as too narrow

Group exercise

- Develop project intervention logic which clearly contributes to one of the specific objective of the programme.
- Define 1 overall objective, 3 specific objectives, 1-2 results, up to 5 outputs.
- Present your project on the flipchart

Group exercise

Task:

Fill in the HIT application form section corresponding to the intervention logic

Objectives:

- to highlight the difficulties that applicants might face when confronted with linking their idea with the narrow strategy of the programme - and with filling in the application form
- to think about the connections between the programme and the project intervention logic in very operational terms
